

Nu-Tek BioSciences: Manufacturing Excellence

The only new dedicated animal-free peptone manufacturing facility in the U.S.

This state-of-the-art, built-for-purpose site will be able to produce well characterized peptones that will enable predictable raw material performance. The systems in place will be second to none and fingerprint each lot produced with incredible precision.

Nu-Tek can also custom manufacture peptones using its technology, which is applicable to nearly any protein source. The site will have the ability to both microfilter or ultrafilter materials and is equipped to perform several types of separation depending upon customer need.

Our Products

Serving a global customer base that includes the largest pharmaceutical supply and pharmaceutical manufacturing companies in the world.

Soy Peptones MF & UF

- Filterable at high concentrations
- Low endotoxin
- Proven alternative to incumbents

Yeast Extract FP100

- Improves cell health & optimizes lactate profiles
- Significant mAb production improvements in CHO platforms
- Filterable at high concentrations
- Low endotoxin

Pea Peptones MF & UF

- Established alternative to soy and animal origin materials
- Filterable at high concentrations
- Low endotoxin

Yeast Extract NTB3-UF

- Improves cell health
- Filterable at high concentrations
- Low endotoxin
- Proven alternative to incumbents in CHO, NS0, Vero, sf9, sf21 and others

The Nu-Tek Advantage

Offering long-term partnerships that address customers' present and future needs.

Transparent & Open to Collaboration

- Cell culture media development
- Optimization to meet specifications
- Flexible packaging

Risk Mitigation

- Manufacturing at multiple sites
- Dedicated animal-free facilities
- Consistent performance lot to lot

State-of-the-Art Manufacturing in Austin, MN:

60,000 square foot facility

9+ acres, with additional land for future expansion

Major design and construction completed by Minnesota companies

Located in Medical Alley

Creating new local jobs

Decreased Exposure

- Few manufacturers worldwide
- Ability to adjust processes
- Capacity to grow with customers
